

5.1 Hardware Specification:

- **5.1.1 Ram:** 4GB
- **5.1.2 Hard drive Storage Needed:** 200GB
- **5.1.3 Other Hardware Requirements:** None

5.2 Platform:

- **5.2.1 Supported Operating System:** Windows XP and above LINUX and MacOS is compatible.
- **5.2.2 Programmer Server:** Wamp Apache Server 3.1.9 64-bit and 2.2e.

5.3 Framework:

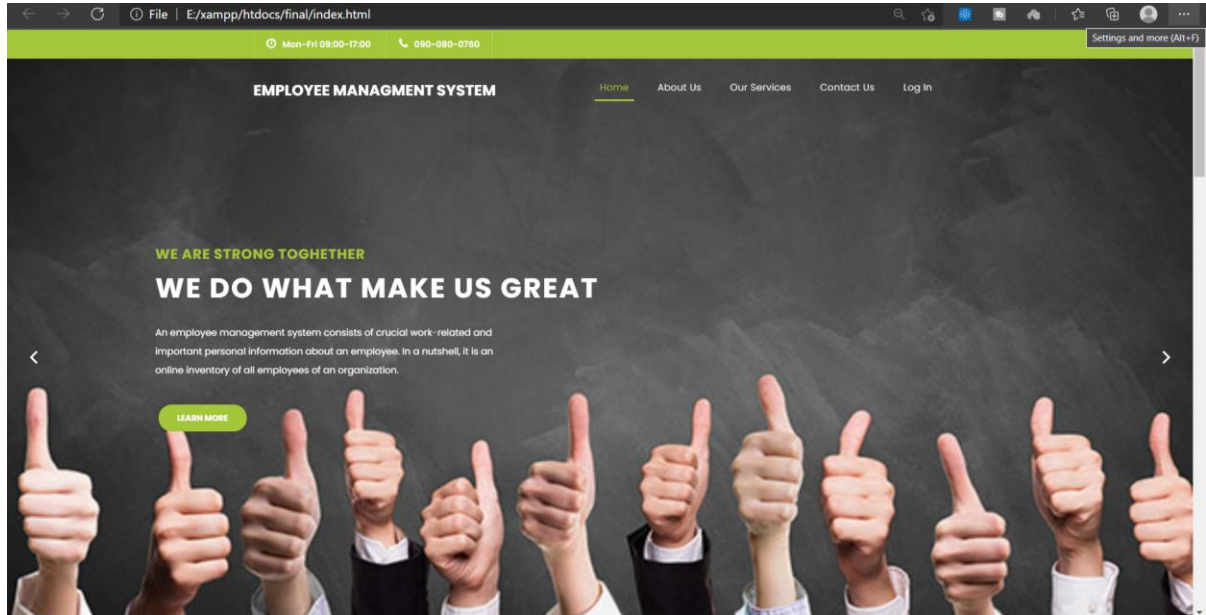

- **5.3.1 Mark-up Language:** HTML4 and HTML5.
- **5.3.2 Programming Language:** PHP 5.3

5.4 Technical Support:

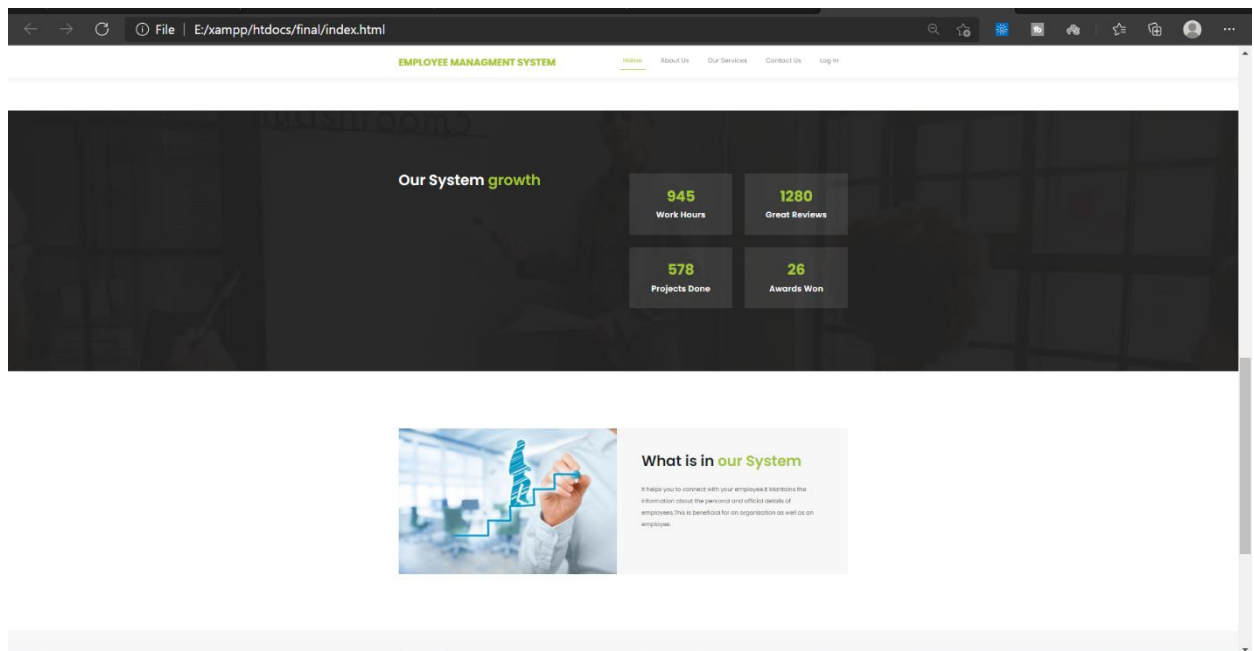

- **5.4.1 Front-End:** PHP 5.3v
- **5.4.2 Back-End:** MySQL5.5.24
- **IDE Tools:** Sublime Text3 and Marco Media Dreamweaver.
- **UML Tools:** Microsoft Office Visio 2007
- **SRS Tools:** Microsoft Word 2016.

[Figure : Employee Submitted Work]

[Figure : Employee Submitted Work with Details]

The screenshot shows a web browser window at the URL `localhost/final/employee/empsubmitpro.php`. The page has a dark header with the user's name 'Shruti' and a sidebar menu for an 'EMPLOYEE' with options like Home, Projects, Leave Status, No of Leave, Apply Leave, Change Password, View Profile, Submit, and Logout. The main content area is titled 'APPLY LEAVE' and contains a form with a dropdown menu set to '3 - CMS' and a text input field containing 'acv'. A red 'Submit' button is below the input field. A validation error message, 'Please enter a URL', is displayed in a yellow box next to the input field.

CONCLUSION

It was a great experience to design and implement the Employee Management System by using PHP and to work on its documentation. While working on this project we have learned many things especially how to apply the concept of PHP in modelling of real world system. This project is developed using php, html, css, and MySql fully meets the objective of the system which it has been developed. This project is used for computerizing employee management work in offices etc. The software keeps record of employee's evaluation, salary etc. The software is capable of easy storage of information related to employee through database.
